## **OXYSWING® Medical Oxygen Generators – Medical Oxygen Analysis**

[IGS Italia](#) is proud to announce an important extension of its [oxygen product portfolio](#) with a new Medical Oxygen Gas Analyzer. Beside the real-time measurement of the oxygen content by means of a paramagnetic sensor, this instrument is also able to analyze the CO and CO<sub>2</sub> content of the produced oxygen at the same time.

Laura Ammiraglia, Marketing & Sales Manager of [IGS Italia](#), comments: “IGS is continuously involved to extend the safety level of its medical oxygen systems beyond market standards. Our unique [OXYSWING® Modular PSA Oxygen Generators](#) have already been approved as Class IIB medical device according to the European Directive 93/42/CE. Now our customers will also be fully compliant with the new oxygen monograph of the EU Pharmacopoeia with the addition of this new accurate and constant gas control system. The combination of both products will offer them all benefits of on-site medical oxygen generation. Additional information is available on our [Medical Oxygen](#) web page.”

[Innovative Gas Systems](#) is one of the world’s major suppliers of on-site air separation plants for the production of nitrogen and oxygen. IGS’ technologies for the production of nitrogen and air drying by [Hollow Fiber Membranes](#) (Generon®) and for the production of nitrogen and oxygen by optimized [Pressure Swing Adsorption](#) processes ([NITROSWING®](#) & [OXYSWING®](#)) set new market standards in terms of performance and efficiency. IGS has [production facilities and numerous sales and service centers](#) in North America, Europe, Russia, Middle East, Asia and the People’s Republic of China.
