

OXYSWING® generators for use in Colombia

IGS ITALIA, through its local distributor, has been awarded a contract for the supply of its OXYSWING® PSA medical oxygen generators to several hospitals in Colombia, South America.

In total, twelve OXYSWING® systems of various sizes, with oxygen flow rates of up to 1.100 litres per minute, will be supplied. The value of the total order is €1m and the first set of units have already been delivered.

Laura Ammiraglia, Marketing & Sales Manager of IGS Italia, commented, "We are extremely delighted with this order as it demonstrates again that our OXYSWING® PSA medical oxygen line is the preferred solution for an increasing number of new customers in various parts of the world, despite tough local and international competition."

"Beside the excellent product quality and the unmatched system flexibility of the modular

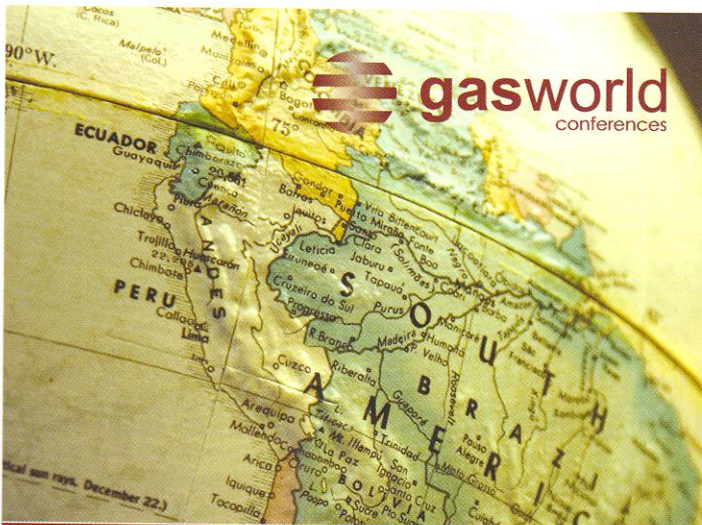

OXYSWING® PSA medical oxygen generators, our customers especially appreciate the superior efficiency of our products as a consequence of the increasing energy prices."

Innovative Gas Systems (IGS) is one of the world's major suppliers of on-site air separation plants for the production of nitrogen and oxygen.
