

## Top Quality Italian Olive Oil from F.Ili Ruata

**F.Ili Ruata Spa** is entirely owned by the Ruata family who has been selecting and trading the best Italian olive oils for three generations. Extra-virgin Olive Oil, Refined Olive Oil, Olive Pomace, Grape-seed

oil and selected Organic and D.O.P. (Protected Origin) oils are the most prestigious products of the company's oil mill. Peanuts, Sunflower, Corn, Soy, Colza, Mixed seeds, Fractionated Palm, Sesame oils, Walnut oil, Hazelnut oil are also available.

F.Ili Ruata spa owns the Ligurian "Goccia D'oro" brand which witnessed the processing of 12 million liters of oil during the year 2008.

The company is located in Northern Italy, with headquarters in the old farm "Fattorie Tenuta del Roero", a family estate specialized in the production of natural products grown in accordance with the strictest principles of organic farming.

From its old and traditional seed cold-pressing mill, the company has developed into the present modern production plant for seed and olive oil bottling and packaging, covering more than 9.000 sq m, and stock of oil in

tanks greater than 3.500 tons.

Production lines fill glass and PET bottles ¼, ½, ¾, 1, 2 liter; as well as 1, 5, 25 liter cans, 213 liter barrels and 1.100 liter tanks.

The production plant is technologically advanced and equipped with an automatic control system based on HACCP to guarantee safety and hygiene. Quality is F.Ili Ruata's main concern; therefore rigorous quality control systems supervise all production phases.

Its control laboratory is managed by skilled chemical analysts who check all chemical-organoleptic parameters of raw materials and finished products. Production batches are examined to meet strict Italian and international standards. All products comply with EU standards and are guaranteed by a Certificate of Analysis.

F.Ili Ruata is specialized in supplying the catering, wholesale, food-preserver and bread-making industries and is also a highly export-oriented company. ■

تنتهي شركة F.Ili Ruata لعائلة رواتا التي تعمل في مجال تصنيع زيت الزيتون الإيطالي العالي النوعية منذ ثلاثة أجيال. يتمتع مصنع الإنتاج بتكنولوجيا متطورة وهو مزود بنظام للتحكم الآلي مرتكز على HACCP لضمان السلامة والنظافة. يدير مختبر المراقبة محللون كيميائيون محترفون، يراقبون من خلاله مراحل الإنتاج بدقة لتتطابق فيها المعايير الإيطالية والعالمية الدقيقة.

## NITROSWING® Modular PSA Nitrogen Generators Flexible On-Site Nitrogen Generation to Extend Product Shelf Life

**IGS Italia** has introduced its modular design NITROSWING® Nitrogen Generators Line for food packaging. The main innovation is the effective possibility of increasing the amount of gas required, directly on site, through few simple operations and with no essential modifications of the NITROSWING® Nitrogen Generator.

**Laura Ammiraglia**, Marketing & Sales Manager of IGS Italia, comments: "High quality shelf-life depends for 100% on the oxygen concentration in the package. Therefore, Modified Atmosphere Packaging (MAP) with nitrogen for oxygen removal is becoming a very common production step for companies aiming at their products quality. With the unmatched system flexibility of our

NITROSWING® Modular PSA Nitrogen Generators we offer our customers a real money-saving nitrogen source, due to the possibility to extend autonomously the necessary gas capacity by adding one or more modules to the generator. In addition, with the NITROSWING® Modular PSA Nitrogen Generators it is even possible to double or even triple the output by adding one or two parallel plants to the main unit, but operated through the control system of the main unit."

Innovative Gas Systems is one of the world's major suppliers of on-site air separation plants for the production of nitrogen and oxygen. IGS' technologies for the production of nitrogen and air drying by Hollow Fiber Membranes

(Generon®) and for the production of nitrogen and oxygen by optimized Pressure Swing Adsorption processes (Nitroswing® & Oxyswing®) set new market standards in terms of performance and efficiency. The IGS has production facilities and numerous sales and service centers in North America, Europe, Russia, Middle East, Asia and the People's Republic of China. ■

قامت شركة IGS Italia بإطلاق خط مولدات النيتروجين NITROSWING® المخصص للتوضيب ضمن صناعة المأكولات. تقوم الفكرة الرئيسية على زيادة نسبة الغاز المطلوب، مباشرة على الموقع من خلال عمليات بسيطة وقليلة ومن دون تعديلات رئيسية على المولدات. شددت مديرية التسويق والمبيعات لورا أميراغليا على قدرة التصميم الفريد في التوفير على مستوى المصاريف لدى الموضيبين.
